PLANT MANAGEMENT

BUSINESS SUCCESS FROM EFFICIENT PLANT MANAGEMENT

In today's world, the demands for compliance with statutory safety regulations and various specified processes are becoming more and more stringent. This ties up staff and know-how which may not be available for other purposes. And that is exactly where we come in.

Against the background of continuous reductions in staffing levels in all industry sectors, we will take the strain off your daily business. For you, that means you can fulfil the legal and safety requirements and at the same time optimize the efficiency of your technical processes.

Our services focus on

- health, safety and the environment,
- safety management,
- consultancy for technical operation and maintenance systems, and range from the provision of specialist staff and advice, through comprehensive project support and continuous updating to responsibility for all the tasks occurring in the field of health, safety and environmental protection.

SAFETY MANAGEMENT

We can draw on many years of experience and extensive know-how in the field of safety management, and will support you in issues of occupational health and safety and fire protection. In this context, our work focuses on the compilation and updating of hazard assessments and the evaluation of risks.

On request, we will assist you in processing technical documentation such as explosion protection documents and standard operating procedures, etc.

TECHNICAL OPERATION AND MAINTENANCE SYSTEMS

We will be pleased to assist you in all your technical operation and maintenance issues from the first request to complete reporting. We assist you in the selection of the right systems, implementation of new features in your existing systems, or develop a customized solution for your requirements at our offices. With our services, you receive a solution individually tailored to suit your needs.

FULL SERVICE SOLUTION FOR HEALTH SAFETY & ENVIRONMENT

Our cooperation with software developer ecointense in Berlin enables us to provide you with a full service package for the areas of health, safety and environmental management, energy and sustainability management.

With EcoWebDesk, a modular, web-based software package, you will have all the requirements from these fields comfortably within your grasp. Numerous functions help you in documenting, evaluating and controlling your corporate processes.

In combination with our plant management services, you can also optimize cooperation between colleagues, management and external providers.

We will be pleased to advise you.

ENVIRONMENTAL PROTECTION MANAGEMENT

With our experienced staff in the field of environmental protection management, we are your expert partner in the handling of issues involving waste and environmental law. We will prepare your environmental approval and permit procedures and assist you in their implementation.

If you are considering renovating your old plant or dismantling it, we can assist you with the planning for these processes too. We are also engaged in the field of hazardous materials management and will be pleased to make our trained and experienced professionals available to support you.
